SCIENTIFIC PROGRAMME

Opening Ceremony
D. Abramowicz, Descartes Chairman (Belgium)
U. Maggiore, Descartes Secretary (Italy)

Pre-transplant issues and infectious complications
The extended criteria donor - the clinical relevance of the kidney donor profile index. D. Abramowicz (Belgium)
The risk of living donation: should I accept this particular living donor? C. Dudley (United Kingdom)
Pre-emptive kidney re-transplantation - if yes, when and for whom? A. Dębska-Śliżień (Poland)
Pulmonary complications in renal transplant recipients. U. Maggiore (Italy)
Cytomegalovirus: monitoring, prophylaxis, therapy. S. Schwartz Sørensen (Denmark)

Dealing with threats to allograft survival
New concepts in recurrent glomerular disease. A. Więcek (Poland)
Treatment of chronic antibody mediated rejection - an update. M. Durlik (Poland)
BK Polyoma nephropathy: new insights into pathogenesis, prevention and treatment. U. Heemann (Germany)

Dealing with threats to patient survival
Post-transplant lymphoproliferative disorder (PTLD) in renal transplant recipients: clinical manifestations, treatment and prognosis. M. Krajewska (Poland)
Predictors of cancer risk in the long-term renal transplant recipient: surveillance strategies. J. Pascual (Spain)
Cardiovascular complications after renal transplantation: prevention and treatment options. M. Klinger (Poland)

Current approach to immunosuppression management
Pharmacogenetics in kidney transplantation: recent updates and potential clinical applications. T. van Gelder (Netherlands)
Immunosuppressive regimens in 2015. K. Budde (Germany)
Non-invasive biomarkers for tolerance, the Descartes tolerance project. A. Massart (Belgium)

Free communications - the three best scored abstracts

Closing remarks
D. Abramowicz (Belgium)
